What Cup Size is 325cc Breast Implants?

325cc breast implants

Are you thinking about breast enhancement with [325cc breast implants](#)? One of your questions will be about what your breast size will be after the surgery. In addition, profile of the breast implant (either low, moderate, or high) will also affect how 325cc will change the size of your breasts. Many cosmetic surgeons say that higher profile [325cc breast implants](#) s are suggested for women with a breast width that is smaller, while a lower profile [325cc breast implants](#) are a better choice for women with a wider breast, such as a 36 or 38 inch band size.

There are several ways that women have tried to answer the question of choosing the right breast implant size. The simple reasons this is true is because: 1) every woman's body is unique and 2) there is no standardized method of measurement from the bra manufacturers. With this in mind you should know that these sizes are just estimates. Contact your breast augmentation surgeon for more information. It is only your breast implant surgeon who can most accurately predict how [325cc breast implants](#) will change the size of your breasts.

What will my breast size be with 325cc breast implants?

Based on this implant size, if you are an A cup today you will most likely be a small C after the procedure. If you now wear a B cup you might be in the range a small D afterwards, and if you presently have a C cup you will likely be in the range of a DD after receiving the implants. Many plastic surgeons have said that it takes about 175cc to 200cc to increase your bust size by approximately one cup size. There are many factors that can affect these approximations however such as the profile of the breast implant (low, moderate or high), placement under the muscle or over, and more.

Using Breast Implant Sizers To Estimate Your Size With 325cc breast implants

Recently, the best method for estimating how [325cc breast implants](#) will change your breast size is to get a great set of breast implant sizers. The newest breast implant sizing systems on the market today is very effective in helping you decide what implant size is right for you. Many women thinking about this size of implants will buy a set of breast implant sizers, using sizers at least 50cc's both larger and smaller than [325cc breast implants](#). In years past women were allowed only to try out breast implant sizers in the plastic surgeon's office, but today you can buy a system to use at home on your own time.

Implant Sizers for 325cc breast implants

When it comes to breast implant sizers, there is simply no better system

than Purlz sizers. There is truly nothing like an actual trial of wearing varying breast sizes similar to [325cc breast implants](#) to identify which of the sizes is best for your body type. Purlz are tester implants, created like a breast enhancer comparable in size and proportion to that of real breast implants. Purlz were created to look and feel natural in nearly any clothing, doing nearly any activity. Wearing Purlz is an excellent way to basically test-drive different breast sizes.

Show Me [325cc breast implants](#) Before and After Photos

Before and after photos of [325cc breast implants](#) are definitely interesting to look at, but you need to understand that these pictures can contain distortions. Using your 325cc implant sizers make two photos, both with and without your preferred breast implant sizes. In this method you are creating before and after photos of yourself that you can show to your plastic surgeon. Bring your pictures to your breast implant surgeon so that you can talk about how you felt about the experience with each of the different breast sizes.

Are [325cc breast implants](#) the best size for you?

Is 325cc the right implant size for you? Maybe I should answer the question this way: How will you know until you try them out? After your surgery you may have wished to have gotten 50ccs larger or smaller, but if you have not tried on the sizers you will never really know. Try out different implant sizes today with the Purlz Breast Sizing System. I recommend wearing sizers even before your consultation if you can. Just wear them as often as you can so that you can make an informed choice just before the surgery.

Please do not underplay the importance of the breast augmentation size decision. When you consider that all the costs and risks exist with a second surgery you should spend as much time as possible preparing as much as possible for our breast implant surgery. Avoid the leading mistake in breast implant surgery by trying on your new breast size with [325cc breast implants](#) before you make your final choice. The cost of an excellent set of breast implant sizers is really very small considering the true cost of breast augmentation.

Studies have shown that women who are dissatisfied with their breast augmentation afterwards, wish they had chosen a different size of breast implants. Most of these women have reported, in fact, that they wish they had opted for a slightly larger size. In some cases they underestimated how well their new look would be perceived by family and friends. For women that have tried sizers for [325cc breast implants](#) before breast augmentation, they get the opportunity to get over this perception before they make their final size decision. Try wearing your breast implant sizers in as many situations as possible. Wear them to work, at home, or out shopping. Trying different sizes over time can help you make our decision!
